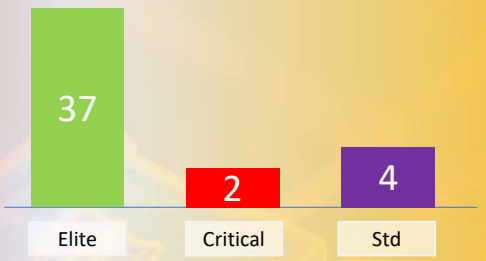
PQC Compliance Dashboard

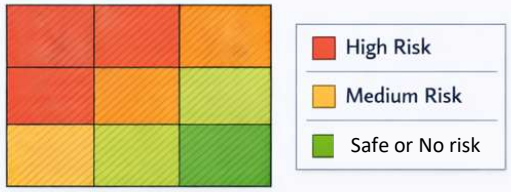
Elite-PQC Ready: 45% | Standard: 30% | Legacy: 15% | Critical Apps: 8

Assets by Classification Grade



Application Status

Risk Overview



Assets Name	PQC Support
Digigrihavatika.pnbuat.bank.in (103.109.225.128)	✓
wcw.pnb.bank.in (103.109.225.201)	✓
Wbbgb.pnbuk.bank.in (103.109.224.249)	✗

Improvement Recommendations

- Upgrade to TLS 1.3 with PQC
- Implement Kyber for Key Exchange
- Update Cryptographic Libraries
- Develop PQC Migration Plan

App A Details

- App A
- Owner: Team 1
- Exposure: Internet
- TLS: RSA / ECC
- Score: 480 (Critical)
- Status: Legacy

Consolidated Enterprise-Level Cybder-Rating Score

755/1000 Elite-PQC,
Indicates a stronger security posture

Status	PQC Rating For Enterprise
Legacy	*< 400*
Standard	*400 till 700*
Elite-PQC	*>700*
Maximum Score after normalisation*	*1000*

URL	PQC Score
Abc.com	*100*
Add.com	*50*
Acc.com	*0*

Tier	Security Level	Compliance Criteria	Priority/Action
Tier-1 Elite	Modern best-practise crypto posture	TLS 1.2 / TLS 1.3 only; Strong Ciphers (AES-GCM / ChaCha20); Forward Secrecy (ECDHE); certificate >2048-bit (prefer 3072/4096): no weak protocols; no known vulnerabilities: HSTS enabled	Maintain Configuration; periodic monitoring; recommended baseline for public-facing apps
Tier-2 Standard	Acceptable enterprise configuration	TLS 1.2 supported but legacy protocols allowed; Key>2048-bit; Mostly strong ciphers but backward compatibility allowed; Forward secrecy optional	Improve gradually; disable legacy protocols; standardise cipher suites.
Tier-3 Legacy	Weak but still operational	TLS 1.0 / TLS 1.1 enabled; weak ciphers (CBC, 3DES); Forward secrecy missing; Key possibly 1024-bit	Remediation required; upgrade TLS stack; rotate certificated; remove weak cipher suites
Critical	Insecure / exploitable	SSL v2 /SSL v3 enabled; Key <1024-bit; weak cipher suites (<112-bit security) Known vulnerabilities	Immediate action block or isolate service; replace certificate and TLS configuration patch vulnerabiilties
